

MIXING INSTRUCTIONS FOR APPROXIMATELY 500g OF BASE MIX

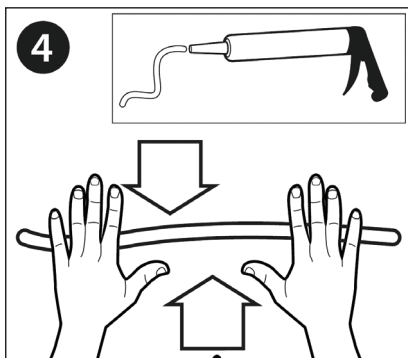

1
The first step of the boillie mix is to crack four eggs of any size into a mixing bowl.

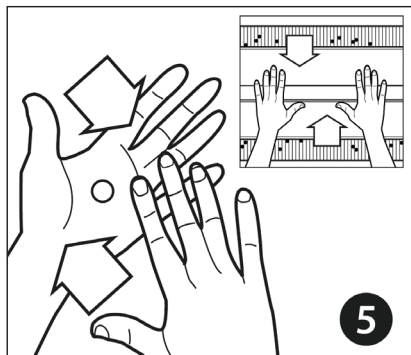

2
Now add your liquid additives, flavours, sweeteners etc. and whisk thoroughly.

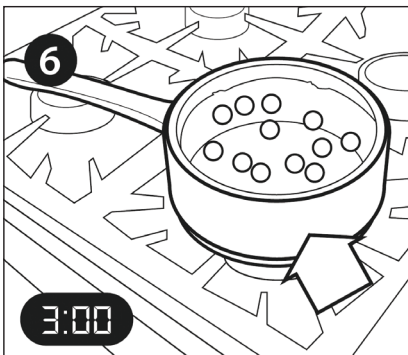

3
Add base mix to the liquids a little at a time, mixing together well to form a paste.

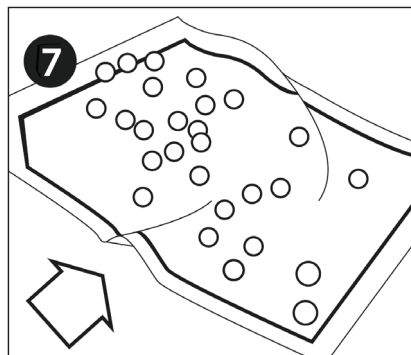

4
Roll the paste out into sausages by hand or with a bait gun to the desired diameter.

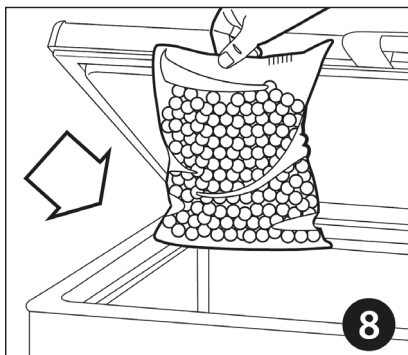

5
Cut the paste into equal sections and roll into balls by hand or using a rolling table.

6
Boil the baits for 2-3 minutes in a saucepan of water maintaining a vigorous boil.

7
Remove boillies from pan and layout on a kitchen towel to air-dry and harden off.

8
The boillies are now ready to use or place in a plastic bag and freeze until required.

Protein Plus Mix
5ml Sweet Plum
5ml Milky Toffee
2ml Hydra Sweet

Essential Opal Mix
5ml Tutti Frutti
10ml Multi Stim
2ml Hydra Sweet

MIXING TIP

The best indicator that the paste has reached the correct consistency for rolling is once the paste no longer sticks to your hands while mixing. At this point the texture should be evenly firm yet pliable and will roll without residue.
